APPENDIX:

The Appendix includes the following item(s):

- ☒ - a new or amended Abstract of the Disclosure
- ☐ - a Replacement Sheet for Figure of the drawings
- ☐ - a Substitute Specification and a marked-up copy of the originally-filed specification
- ☐ - a terminal disclaimer
- ☐ - a 37 CFR 1.132 Declaration
- ☐ - a Substitute Specification and a marked-up copy of the originally-filed specification
- ☐ - a verified English translation of foreign priority document

Abstract of the Disclosure

A positive engagement clutch has a torque input side and a torque output side. The clutch comprises a torque input member arranged on the torque input side, a torque output member arranged on the torque output side, first engagement members, second engagement members, and an actuator. The torque input member and the torque output member are arranged concentrically to rotate on a common axis. One of the torque input member and the torque output member carries the first engagement members, and the other of the torque input member and the torque output member carries the second engagement members. The first engagement members are radially movable by the actuator between a projecting and a retracted position, and the second engagement members project radially into a gap between the torque input member and the torque output member.
